

THE SMARTER ONE GIVES WAY

Difficult mowing jobs require intelligent solutions. Those who must mow high growth two or three-times a year, are often confronted with demanding tasks.

Obstructions concealed in the grass can often damage machines. Flail mowers mow with a horizontal flail rotor. The Y-flails are movably attached on the rotor and can give way to foreign objects in case of an impact

The flails effortlessly beat and shred thicker shrubbery, branches, undergrowth, and natural high grass into small pieces.

It is not necessary to dispose of the cuttings; they remain as mulch on the surface. The chopped plant decomposes quickly. Thus, perfect for ditches, steep meadows and green areas, such as eco orchards, meadow orchards, parking facilities or road verges.

AS 901 SM / AS 701 SM

The cutting width of 90 cm or 70 cm enables a high work rate. Easy manoeuvring with the unique single-wheel steering by brake clutch.

The precision 5-speed manual transmission with limited slip differential, together with twin tyres (AS 901) ensures strong traction and braking effect, even on steep slopes. Large dimensioned tyres, as well as powerful wheel drive facilitate the work. Best manoeuvrability thanks to the front wheels that rotate 360 degrees.

An operator's stone guard and the stone guard protective flaps ensure safety for man and machine.

FIRST CHOICE FOR REAL PROS: FLAIL MOWERS FROM AS-MOTOR

ROBUST FLAIL MOWER DECK

Generously dimensioned axle with maintenance-free bearings and Y-flails that can be used on both sides.

HIGH WORK RATES

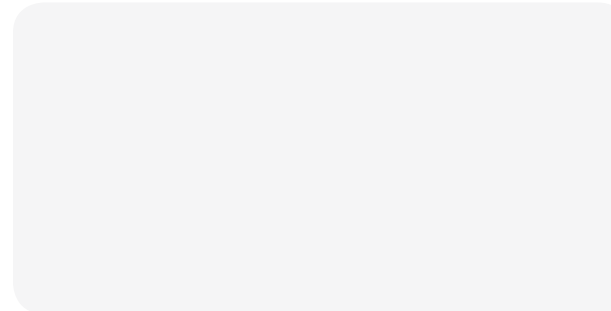

Ideal for mowing and mulching extensively used areas and especially on slopes.

LIGHTWEIGHT AND BALANCED

Stable lightweight construction with a double-wall mow unit and a rigid frame construction. Low, mid centre of gravity for perfect balance and performance on slopes.

AS-MOTOR FLAIL MOWERS

AS 901 SM

Outstanding performance on slopes, automatic parking brake, 5-speed manual transmission, unique brake-steering system, limited slip differential, twin tyres, rear-wheel drive. B&S 4-stroke engine, 2-cylinder Vanguard V-Twin, 480 ccm.

Rated power 10.7 kW (14.5 hp),
max. 11.9 kW (16.0 hp).

Cutting height 10–100 mm,
cutting width 90 cm.

AS 701 SM

Automatic parking brake, 5-speed manual transmission, unique brake-steering system, limited slip differential, rear-wheel drive.

B&S 4-stroke engine, 1-cylinder Series 3 Intek, 344 ccm.

Rated power 7.6 kW (10.3 hp),
max. 9.7 kW (13.0 hp).

Cutting height 10–100 mm,
cutting width 70 cm.

BLADE SYSTEM

Pendeling steel mowing deck with horizontal flail mowing deck, 20 respectively 26 pairs of Y-flails cut and mulch up grass and scrub. Double-safety stone guard to the back.

MACHINE CONTROL

Turn on a sixpence, the unique AS brake-steering system makes it possible.

HEIGHT ADJUSTMENT

Easy cutting height adjustment of the mower deck via lever.

MANUAL TRANSMISSION

The 5-gear manual transmission with differential lock, ensures optimal drive even on a wet surface.
